

Installing the Martin Audio Ceiling Speaker Wizard (MS Windows only)

- 1) Clicking [HERE](#) takes you to a zip folder containing the installer software. Extract the **setup.exe** file to a suitable place on your pc – your desktop is a good place as the setup file may be deleted once you have installed the wizard.

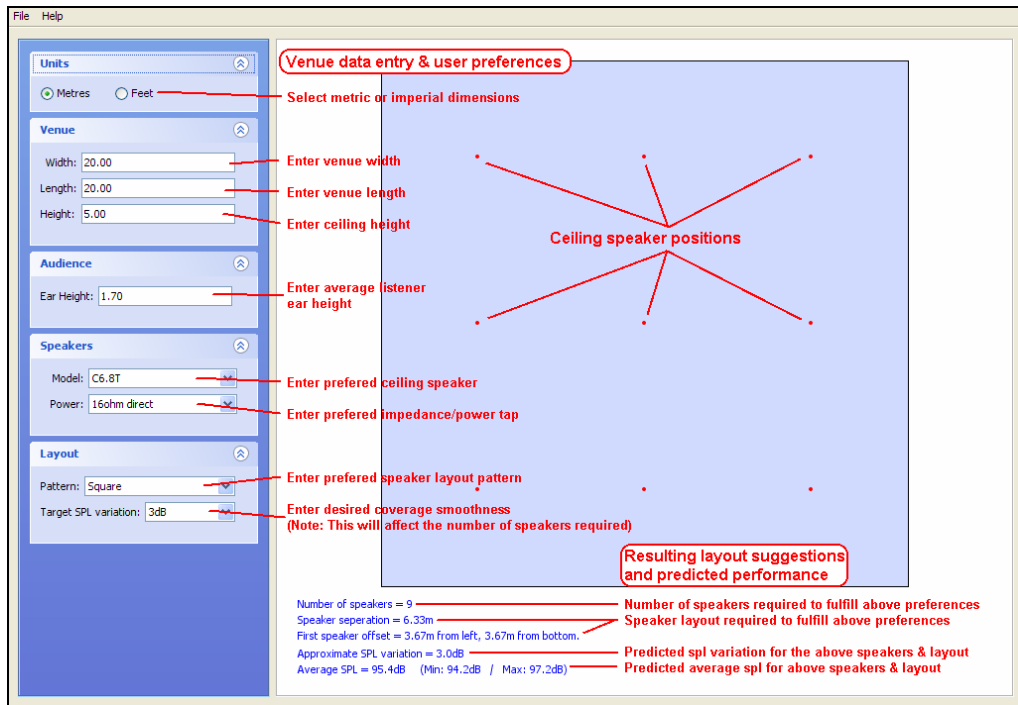

Do not run the programme from the zip folder. Run **setup.exe** and follow any on-screen instructions.

- 2) **Ceiling Speaker Wizard** A shortcut will be placed on your desktop.

Double-clicking on the shortcut will start the programme.

- 3) The following screen will appear. Enter the venue parameters and your ceiling speaker preferences down the left hand side (see red notes). The ceiling dimensions will appear in the centre of the screen.

- 4) The suggested speaker layout will be shown as red dots.

The suggested speaker quantities and performance predictions will be shown in blue at the bottom of the page.
